**DocuSign®** | Silver Partner

As distinguished partners of both DocuSign® and OpenText™, Fastman offers extensive knowledge and a proven track record in eSignature implementations. We've helped numerous global organizations streamline signature processes and enhance efficiency, including compliance with EU and UK Qualified Electronic Signature (QES) standards. Our turnkey solutions feature AI-enabled signer identification, seamlessly integrated with your Extended ECM system.

Fastman also provides comprehensive support, including demonstrations, project scoping, demand planning, budgeting, cyber/data protection, and configuring your eSignature proof of concept to ensure internal approval.

## End to End DocuSign® and Extended ECM Integration

At Fastman, we understand that a successful eSignature integration requires more than just a technical solution—it demands comprehensive pre- and post-implementation support to ensure everything runs smoothly. Our team of experts offers hands-on assistance throughout the entire process, from planning and purchasing

your DocuSign® licensing to designing the optimal business process that integrates seamlessly with your Extended ECM platform. With our in-depth experience in both the OpenText™ and DocuSign® ecosystems, we tackle common challenges head-on, ensuring compatibility with various versions, interfaces, and use cases.

Our support does not end at deployment. Fastman provides ongoing services, including training and adoption consulting, to ensure your teams are equipped to maximize the benefits of your new eSignature workflows. Whether it's addressing compliance issues, security requirements, or managing complex approval workflows across departments, Fastman's domain expertise and tailored solutions ensure a flawless eSignature process that evolves with your business.

**If you're not using DocuSign yet, consider Fastman for a comprehensive Extended ECM for DocuSign signatures solution. As a leading DocuSign partner, we'll set up and integrate your digital signing environment seamlessly with your OpenText workflows.**
