

Fastman Information Governance Toolkit

Quick positioning

What it is:

A native toolkit that enhances OpenText Content Management by delivering enterprise-grade Information Governance (IG) — enabling secure, compliant, and AI-ready content.

What it unlocks:

It powers Content Aviator and similar AI or automation initiatives by ensuring content quality, access control, and metadata integrity.

Who it's for:

Any OpenText customer struggling with governance, preparing for AI rollout, or facing compliance pressure — especially in regulated industries.

Why it matters

Modern AI and automation (e.g., Content Aviator) require clean, compliant, and secure content.

Most organizations aren't ready.

Common issues:

- **Outdated permissions** → Data leaks, security risks
- **Untracked access** → Audit nightmares
- **Inconsistent metadata** → AI and automation failures
- **Duplicate or stale documents** → Operational drag

That's where Fastman fits — and where OpenText teams can add value.

Toolkit breakdown (with AI impact)

Fastman toolkit	What it does	Content Aviator impact	The "a-ha" moment
Permissions Manager	<ul style="list-style-type: none">• Real-time access control• Bulk changes / rollback• Time-based permissions	AI only retrieves secure content. No data leaks.	'Wait... how did marketing see our compliance reports?' Fix permissions instantly
Access Manager	<ul style="list-style-type: none">• Block risky actions• Apply rules based on roles / metadata	AI filters out irrelevant content.	'Why is AI pulling outdated contracts?' Prevent unauthorized changes
Time-based Access	<ul style="list-style-type: none">• Auto-expiring permissions• Self-service access requests	AI ignores stale or outdated documents.	'Did we ever remove access for that external auditor?' Auto-revoke expired permissions
Bulk Data Manager	<ul style="list-style-type: none">• Migrate and update metadata in bulk• Auto-tagging for compliance	AI gets clean, enriched metadata on the latest info.	'Legal based a decision on outdated summaries!' Fix all metadata with one click

Each tool works standalone or as part of a suite. Built 100% for OpenText.

Your benefits

- **Fast time to value** — No integration headaches
- **Reduces IT workload** — Empowers business users with safe governance tools
- **Unlocks AI-readiness** — Ensures Content Aviator gets quality inputs
- **Boosts compliance** — From audit prep to access control

Available Resources: joint demo and marketing material (videos, assets etc.)

Only Fastman offers:

- Real-time and bulk changes across permissions & metadata
- Pre-built logic tailored to OpenText ECM
- Deep integration and zero platform workarounds
- Precision control for AI-grade governance
